

John Dennis Pedrie

43123 Heydenreich Rd. Clinton Township, MI 48038 | 248-409-8448 | john@pedrie.com

A software engineer with years of experience in developing scalable web-based solutions, leading technical teams, and working with business leaders and open source communities to deliver crafted solutions to difficult problems.

Experience

We Think Right Inc. - Principal **August 2016 - Present**

- Contracted with Google for development and maintenance of Google Cloud PHP. Interface with Google engineers and product managers to determine requirements and deliver solutions. Work with PHP community leaders and members to provide easy to use and understand solutions. Place a strong emphasis on carefully written, documented and tested code, and on responsiveness and community engagement.

Adecco USA - Applications Developer **May 2016 - August 2016**

- On assignment at Google. Responsible for development of Google Cloud PHP, Google's idiomatic PHP wrapper for Cloud Platform APIs.

Quicken Loans - Sr. Software Engineer **March 2015 - April 2016**

- Technical lead for multiple products serving a member of the Quicken Loans family of companies. Led a group of three engineers in development of a marketing website from scratch, as well as leading ongoing development of a wholesale mortgage portal for brokers and banks around the country. Provided mentoring and community help to engineers from my team and others, and delivered shared software components which were used throughout the technology team.

Quicken Loans - Software Engineer **December 2012 - March 2015**

- Enterprise application development for a member of the Quicken Loans family of companies. Led development of a client portal for wholesale mortgage partners using Angular, with a PHP-based RESTful API. Supported subsidiary company website, with heavy emphasis on WordPress plugin development. Maintained mortgage calculator APIs consumed by website and partners. Offered sporadic development support to C# application used by internal mortgage bankers.

Aria Ventures / HorseShow.com - PHP Developer **October 2011 - December 2012**

- Developed custom video sharing and contest site for online horse showing. Utilized Expression Engine CMS and CodeIgniter PHP framework. Made extensive use of the Rackspace Cloud, PayPal and Stripe APIs.

Vice and Victory Agency, LLC. - Co-Founder, Vice President **January 2011 - October, 2011**

- Responsible for maintaining and developing client websites and applications, creating custom solutions to fit client needs, and managing the client services department. Also gained some experience in sales and other aspects of business management. Services included Email Marketing, Web Development, Public and Blogger relations, and other services for politically focused clients.

Profitable Results Marketing - PHP Developer **October 2009 - April 2011**

- Programmer for internet marketing company. Specialized in Wordpress and PHP development. Experience with email marketing, product launches and developing two membership sites that each netted over \$1 million in sales.

Republic Modern Media - *Co-Founder, Vice President*

August 2007 – January 2010

- Provided internet and new media consultation to political campaigns, candidates and organizations. Clients included U.S. Senate candidate Christine O'Donnell, GA Secretary of State candidate Doug MacGinnitie and others. Experience includes email marketing to lists of 20,000 emails, social media management (i.e. Twitter, Facebook, YouTube), and web development.
